

Biological Insecticide

PRODUCT DESCRIPTION

Spindura™ Plus is a biologically derived insecticide formulated with Spinosad, a fermentation metabolite produced by the soil actinomycete *Saccharopolyspora spinosa*. The suspension concentrate formulation ensures stable dispersion and effective delivery of the active ingredient on crop foliage. Spinosad acts through both ingestion and contact activity, disrupting the insect nervous system and causing rapid feeding cessation followed by paralysis and mortality.

MECHANISM OF ACTION

APPLICATION & DOSAGE

Foliar Spray	0.25 - 0.35 mL per litre of water 60 - 90 mL per acre
First Application	At early pest infestation
Repeat Spray	7 - 10 days
Best Time	Depending on pest pressure

TARGET PESTS: Caterpillars, Thrips, Leaf miners, Fruit borers, Pod borer, Diamondback moth, Dipteran larvae, Colorado potato beetles, Lepidopterous larvae (worms & caterpillars), army worms, spotted wing drosophila, flea beetles.

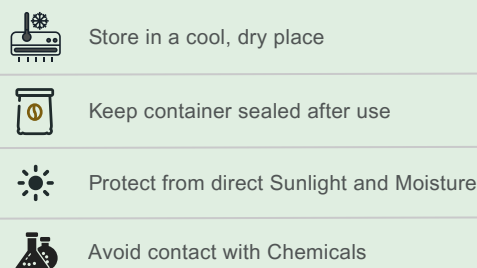

KEY BENEFITS

TECHNICAL SPECIFICATIONS

Parameter	Specification
Active Ingredients	Spinosad
Concentration	25.2% SC
Botanical Source	<i>Saccharopolyspp spinosa</i>
Formulation Type	Suspension Concentrate
Appearance	White color liquid
Shelf Life	24 months
Solubility	Completely soluble in water

STORAGE & HANDLING
